"Providing safe, high-quality & innovative fire/rescue education & training"

## Rope Rescue: Technician

### Get to the Heights with Technician Level

This 40-hour course in advanced rope rescue systems satisfies the requirements of NFPA 1670 4-4 Rope Rescue Technician.

At the conclusion of the course each student shall demonstrate the proper use of standard rope rescue techniques within the high-angle/low-angle environment, including:

- Constructing single-and-multiple-point anchor systems
- Deploying a fixed rope system, incorporating proper belay devices
- Descending a fixed rope system for purposes of victim rescue
- Moving a victim in a high-angle or vertical environment, utilizing victim transfer devices and specialized equipment necessary for the environment
- Demonstrating proper procedure for knot passing through a rope system
- Operation of both compound and simple rope mechanical advantage systems
- Construction of a highline (tensioned) system
- Operation of a high-line system
- Ascending a fixed rope

Students will participate in rope rescue operations based on real world scenarios. They will demonstrate competency individually and as members of a response team.
